

Slovenija Slabonik Portfolio

There is a reason why love is in my name.

I firmly believe each design piece in this portfolio shows off my advanced graphic design knowledge and artistic spirit. While working on each piece from the start, I made sure to create and revise the correct color palette, shape, form, and texture appropriately.

To embrace the numerous artistic talents I have, there are multiple design pieces in this portfolio that feature my own photography and personal painting projects.

I have always taken pride in coming up with unique ideas when it comes to the creative process. I believe each design piece in this portfolio has a personal and creative aspect related to my personal self-expression and originality.

I believe that my work is well done regarding craftsmanship, attention to detail, and ethicality. I have created design pieces that I believe represent my colorful and passionate artistic abilities. They each include the presentation of clarity and resolution of image, accuracy of colors, understanding established grid and format, readability, and conversion of file type to the appropriate print or screen publication.

Thank you for taking time to review my portfolio. I am looking forward to the future with new creative job opportunities.

With love,

Slovenija
